

# Smart SASE with NetSecOps

In today's dynamic and interconnected digital landscape, organizations face the pressures to be hyper-connected and at the same heightened risks to due cybersecurity challenges. The traditional approach to connectedness and cybersecurity is no longer sufficient to protect against sophisticated threats. COSGrid Networks' Smart SASE with NetSecOps platform provides a Always ON and secure Connectivity Anywhere & Anytime enabled by Multi Radio 4G / 5G SD-WAN for branch offices, remote workers, OT/IoT and Cloud. COSGrid's Z3 approach enables organisation with a seamless connectivity, Holistic security, User Experience Visibility and simplified management.

## Z<sup>3</sup> SASE - Zero Glitch Connectivity | ZeroTrust Security | Zero Touch Operations

Superior Connectivity Uptime and Application Performance

Secure Access for Branch Offices, Teleworkers and OT

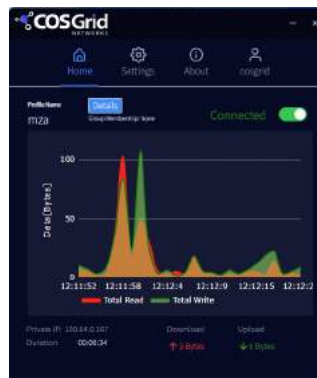

Reduced Risk using Zero Trust Access

Seamless Manageability and visibility with NetSecOps

Multi Radio 4G/5G SD-WAN /NGFW

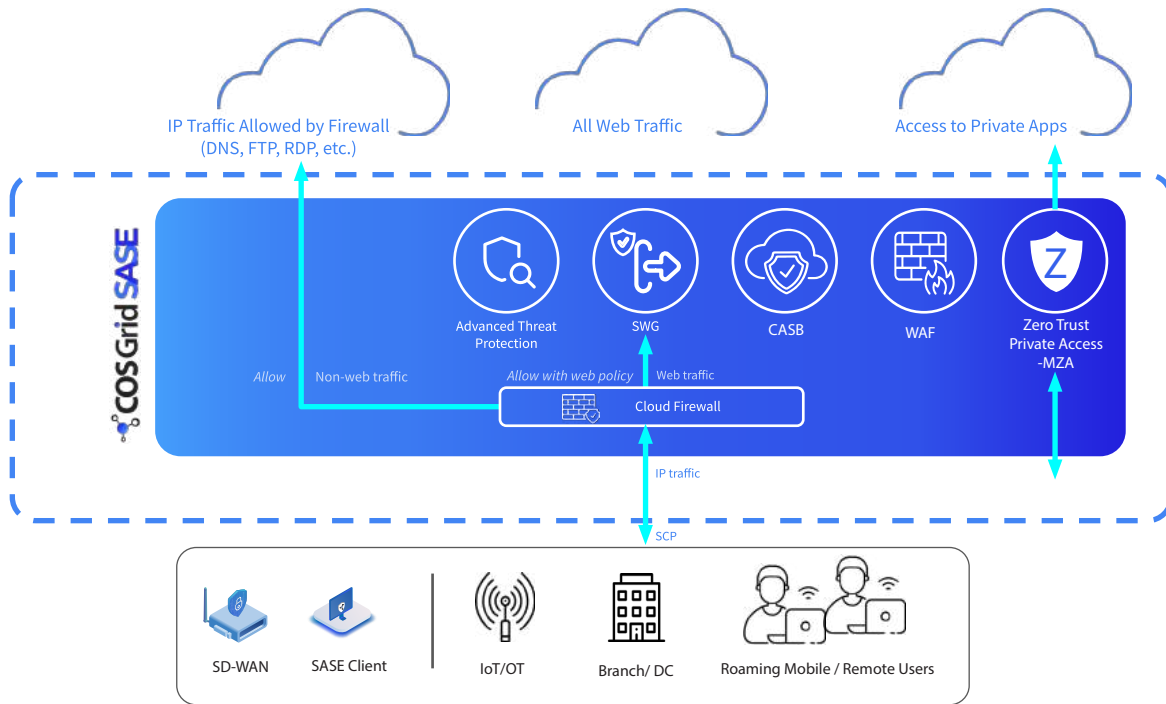

MicroAccess App

COSGrid's Orchestrator

# COSGrid SASE Architecture

## Benefits & Outcomes

- **Zero-glitch Network experience** through patented Multi-path traffic Aggregation & Adv Traffic Steering
- **Zero Trust Access & microsegment** using device trust and geo-fencing SaaS Application acceleration
- **Only NetSecOps platform** that delivers Network Security, SD-WAN and UEM in single console
- **3X higher accuracy in detection** through multi-pronged approach.

More Reliable & Visible Security

Agile & Simple Ops

Network Reliability & Performance

Integrated & Converged Solution
